Trilogy Care

Finding service providers

One of the benefits of self-managing your Support at Home funding is having the flexibility to choose your care or service providers.

There are many ways to find service providers in your area and, depending on where you live, there could be service providers in your area looking to support more people like yourself.

How to source service providers:

- Your existing carers or service providers
- Recommended by a friend, family member or health worker
- Local service providers
- Online service provider platforms or carer marketplaces

Local service providers can be found through:

- Local directory boards
- Community support groups
- Local newspapers
- Google search

Online service provider platforms or carer marketplaces such as:

- CareVicinity
- Hireup
- Like Family
- Careseekers
- Find A Carer
- Mobility

* Carers and service providers cannot be family members

* Carers and service providers will need to complete compliance checks to be paid via your Support at Home funds. Read more about compliance requirements on our website trilogycare.com.au/carerqualifications
