Trilogy Care

Trilogy Care support comparison

Self Managed Care Services:

- Trilogy Care's Self Managed is our most affordable Support at Home option.
- When self-managing, it is up to the client to source, schedule and manage their own services, workforce and equipment.
- Trilogy Care administers the financial component of the budget (payments, reimbursements, financial statements, liaising with Services Australia etc.), worker compliance and assign the client their own care partner to create and manage a care plan and budget.
- Self-management gives the client choice and control over their care workers and support services.
- Trilogy Care's Self Managed offering is one of the best value-for-money Support at Home options in Australia.

Fully Coordinated Care Services:

- Trilogy Care's Fully Coordinated is our most supported Support at Home option.
- When Fully Coordinated, a care coordinator, in conjunction with Trilogy Care, manage all aspects of the client's Support at Home funding.
- The main difference between the two options is that with Fully Coordinated, the client is allocated a care coordinator to source and manage their workforce, services and equipment.
- This offering is still competitively priced and, unlike other fully managed providers, the client still has decision-making power because the care coordinator operates according to the client's preferences.
- Care coordinators help organise and arrange the client's care services and visit times, drawing on a network of providers to deliver the best value care with options to choose from.
