Trilogy Care

Self-managing your Support at Home funding

Getting help with the routines of daily life doesn't mean handing over your independence, in fact it's often the best way to protect it. By self-managing your Support at Home funding with Trilogy Care, you stay in the driver's seat of your own life and can turn more of your funding into real care hours, not overheads.

WHAT IS SELF-MANAGEMENT?

Self-management is a great way to keep control over how your Support at Home funding is spent.

It doesn't mean you have to go it alone. It means you have the flexibility to get help with as much or as little of the process as you choose.

- Design your care plan and funding with us
- Gain more control over how your funds are spent
- Choose the support workers you want, and when you want them
- Find services at rates that are acceptable to you
- Use your full quarterly funding so no support goes to waste
- Increase your care hours with lower hourly rates

Why self-manage?

One of the main reasons that people choose to self-manage is it gives you absolute control over who provides your care and services. You can ensure you're surrounded by the best people and receiving exactly the service you want, how and when you need it. Self-management also cuts out the agency 'middle-man', allowing for rate negotiation directly with service providers so you can get the most out of your funding.

Self-management with Trilogy Care
